

October 3, 2012

**TO: Businesses along Texas Parkway:**

Construction may begin as soon as Wednesday, Oct. 3 on raised medians on Texas Parkway from Cartwright Road to Third Street. When complete, the project should offer improved safety for pedestrians and motorists.

The joint venture project between Missouri City and the Texas Department of Transportation will be constructed in phases, with the first to be from Cartwright Rd. to Court Rd. TxDOT is managing the construction. Please be aware:

- There will be one lane of traffic in each direction in non-peak hours. However, during the construction, traffic lanes will be closed in both directions at various times.
- Traffic signals will be modified to accommodate for traffic flow.
- Every effort will be made to minimize traffic disruptions.
- Electronic message boards will be displaying updated information.

After the medians are installed, they will be landscaped with sod, dirt and grass. The entire project is estimated to be complete by May 2013.

We appreciate your patience while this project is completed.
